

**CORONA VIRUS UPDATE 12.03.2020**

Dear Valued Partners,

In light of the current situation related to corona virus, we would like to confirm that **at present all logistics, transportation and storage activities are fully operational.**

Verbrugge International is monitoring the situation on a daily basis and we are taking the necessary measures to mitigate the further spread that could potentially impact our employees, our Customers and Partners.

**In order to prevent a potential further spread**, Verbrugge International has taken additional measures for entering its facilities which include;

- **Screening:** The screening will be done by filling in a short questionnaire. Your participation is important to help us take the necessary precautionary measures. The visitors and contractors are requested to show the filled-out form to the security employee.
- **Body temperature control:** Security will request to take your body temperature. Should a rise in temperature >38°C be noticed, further action will be taken.
- **General hygiene guidelines:** These are applied for all Employees, Contractors and Visitors which consist of;
  - o Clean your hands often
  - o Avoid close contact
  - o Cover coughs and sneezes
  - o Clean and disinfect

We kindly instruct you to follow these during your visit.

As the situation progresses **Verbrugge International will align to eventual more restrictive instructions following the local and regional guidelines related to the corona virus spread.**

We would like to emphasize again that with the current environment, pro-active communication is of utmost importance for us to mitigate impact on our final customers.

Thanks a lot for your full support to:

- share your mitigation plan to minimize the impact and ensure business continuity
- report special loading and/or unloading requirements
- pro-actively communicate delays in transit with information on expected new ETA
- timely communicate capacity constraints
- share country specific governmental obligatory guidelines.

Trusting in your full collaboration, please don't hesitate to reach out to your Verbrugge International contact or email to [info@verbrugge.nl](mailto:info@verbrugge.nl) should you have any further information or questions.

***Verbrugge Management & HSE Team***
